

Servi Fluid Power, Inc.

For immediate release - January 16, 2015

Servi Fluid Power, Inc. is proud to announce their new facility opening!

Servi Fluid Power Inc., a division of the Servi Group, was formed in 2014 to provide the design, assembly and service of Bladder Accumulators including high and low pressure customized designs to suite variety of applications. Additionally Servi Fluid Power Inc. manufactures highly engineered solutions for custom Piston Accumulators based out of our in Rissa, Norway facility.

Servi Fluid Power, Inc., previously operating out of two offices in Houston, have now moved into their new state of the art assembly plant consisting of approximately 20,000 square feet of combined office and manufacturing. The Executive Team have implemented new operations to stream-line the assembly process, while bringing new innovation to the high pressure testing requirements for several regulatory bodies such as DNV, ABS and CE/PED.

Kevin Rasefske, recently appointed President, stated "This is the first stage of our growth that will enable Servi Fluid Power, Inc. to better serve our customer." Mr. Rasefske also indicated that, "We have been embraced by the market and due to our gained efficiency, Servi provides not only quality excellence, personalized customer service and fast delivery but in addition, a cost effective solution."

Servi Fluid Power, Inc. is now providing solutions in North America and Europe with planned expansion into Latin America and Asian Pacific.
